

Flamingo Linear Vibratory Weigh Filler

WeighPro-2 Semi-automatic filling packaging machine consists of main vibration feeder, electrical control box, touch-screen HMI and weighing bucket. This machine fill set product weight. Compared with ordinary semi-automatic filling machines, this machine has several improved features such as Human Machine Interface(HMI) screen and PLC control real-time tracking. There are two available models: 1. twin buckets single-discharge, 2. twin buckets dual-discharge chute. The complete machine is made of Grade #304 stainless steel except electrical appliances.

The filling rate is adjustable with higher accuracy, high stability,

corrosion-resistant, easy clean-up, aesthetic appearance and long-life characteristics. It is used to package food, pharmaceutical, chemical with easy flow or good fluidity powder or granular materials, such as chicken essence, flavor essence, solid beverages, sugar, glucose, coffee, beans & ground, veterinary drugs solid, pesticides, granular powder additives, dyes, and confectionery so on.

Before operating the machine, please carefully read the manual in order to have a clear idea on regular maintenance and the best working conditions.

EFWF-2000

Optional

Auto Top-Up Transfer System Integration

Flamingo Weight Filler can be integrated with a Vacuum Transfer System for automatically re-loading the hopper.

This reduces labour and production cost rapidly during fully-automatic or manual production running process.

Vacuum transfer system transfers many different bulk materials ranging from course powder to granule. i.e: sugar and coffee beans.

Specifications

power source	V	240
packing speed	bags/min	10-40
packaging accuracy	%	1
package weight	g	50-2000
width	mm	750
height	mm	2100
length	mm	970
weight	kg	170
